ONLINE INDUCTION COURSE OUTLINE

AGSAFE DEVELOPS NEW ONLINE INDUCTION COURSE

Agsafe Ltd is pleased to announce the release of a new online Induction course.

Following on from the successful release of online Basic Training, this course will educate new entrants to the industry exactly when they need it – from day one in the workplace.

Designed for those new to the Agvet chemical industry this course combines online learning with reading and research.

Interactive and challenging, the course provides an excellent opportunity for new staff to learn about the industry they have joined in the appropriate setting – their new workplace. Accompanied by a manual provided on enrolment, the online environment also contains all the resources you will need to complete the learning.

CONTENT

The course provides the learner with information vital to a new staff member:

- Introduction to the agricultural and veterinary chemical industry
- The label – what it contains; what it tells you
- MSDS – what they are & why they are important
- Safety overview
- Dangerous Goods – how they are classified
- Scheduled poisons & hazardous substances
- Agricultural and veterinary chemical terms
- Emergency essentials (location of plans and equipment)

DURATION

The course is divided into specific modules that match pace with your work activities – from day one through to the end of the first month at work. The course follows the concept of “day one, week one, month one” in the workplace, assisting the learner through stages of learning to build knowledge about their industry; ultimately gaining an understanding of:

- products,
- the agvet chemical industry
- regulation and government
- the workplace

Additionally, the course and resources can also be used as a workplace reference tool. Learners can research industry relevant topics and questions by exploring the course at their own pace.

TRAINING PATHWAY

Participants successfully completing the online Induction course can go on to complete the Basic course either face to face or online after six months.
